

Stretch Your District Budget Dollars and Find Significant Savings Through Smart Textbook Management

An efficient textbook management system does more than keep track of your textbooks. It can transform a strain on your district budget into an opportunity for savings while ensuring that all students have the materials they need to learn.

In this tough economy, more and more K-12 districts are choosing Follett Software's Destiny® Textbook Manager™ to streamline textbook management and uncover savings opportunities that might literally be collecting dust throughout your district. This browser-based system allows your district to tag, track and manage textbook resources throughout your schools and storage facilities. Textbook coordinators can oversee the textbook inventory from anywhere and get a complete status report, matched to student enrollment and class schedules.

The result? Time-saving processes that ensure the textbook inventory is being used to the fullest, resources are in the hands of your students and savings from reduced overordering can be shifted to other areas of the district.

Turn to the Proven Leader in Textbook Management

- Increase accountability of staff, students and parents, minimizing textbook losses.
- Lower replacement cost by identifying opportunities for transferring textbooks between schools.
- Eliminate textbook shortages and surpluses, helping make sure that every student has access to the right learning materials at the right time.

Losses Reduced up to 80% for One District

A district in California is just one of many who have turned to Destiny Textbook Manager to take control of their textbooks and squeeze the greatest learning benefit out of every instructional dollar. After a five-year analysis of its textbook inventory, the district discovered that it was losing \$120,000 a year—at just one of its schools. Using Destiny Textbook Manager, the district turned that loss into \$106,000 in savings. Throughout the district, expenses resulting from textbook loss have been reduced by 50 to 80%.

The Effect of Destiny Textbook Manager on a District's Budget

- Pomona Unified School District cut textbook losses by 25% and reduced duplicate orders by 70%.
- Escambia County School District saved an estimated \$200,000 within two years.
- Arizona's Higley Unified School District discovered that it didn't need to buy books for a new school and saved \$500,000.

How Much Will You Find?

Think of how much of your money is misplaced by students, sent to the wrong school or forgotten in a back room. Destiny Textbook Manager can help you eliminate these unnecessary losses and create a better learning environment for your students. Every dollar you save with Destiny Textbook Manager is a dollar you can shift to other areas of your budget. You'll do more than organize your textbook resources—you'll find budget help that can strengthen your district as a whole.

What's more, if you're one of the thousands of districts using Destiny Library Manager™ for library collection management, your staff is already familiar with Destiny's easy-to-use interface, and you can use your existing server hardware. Powerful, proven textbook management may be closer and more cost-effective than you think.

Find out how much your district could save with smart textbook management.

Visit www.FollettSoftware.com/TextbookSavings to calculate your potential ROI and view success stories from other districts.

You could have \$106,000 sitting in your storage rooms.

With Destiny Textbook Manager you'll make the most use of these valuable resources.

DESTINY.
